WORK EXPERIENCE

Freelance Unity Developer | Mobile Strategy Game

Feb 2026 - Jul 2026

Mobile real-time strategy game | Unity, C#, REST APIs, Git

- Developed Unity/C# client features for a mobile multiplayer strategy game, including city management, map navigation, player profiles, leaderboards, troop transfers, and battle interfaces.
- Integrated REST APIs with asynchronous UnityWebRequest workflows for player, city, troop, and battle data.
- Built reusable pooled UI list systems with dynamic binding, sorting, callback injection, and dynamic updates.
- Implemented troop movement, mobile touch controls, camera panning, pinch zoom, and UI-aware world interaction using Unity's Input System.
- Eliminated main-thread freezes and improved UI performance through async refactoring, lifecycle-safe event handling, and object pooling.

JanduSoft | Video Game QA Tester (Internship)

Jan 2022 - Apr 2022

- Tested Unity titles for functional, performance, and usability issues.
- Documented reproducible defects and collaborated with developers during verification.

SELECTED PROJECTS

Unity Editor Tooling Developer | Independent Projects

Dec 2025 - Jul 2026

- Built a UI Toolkit scene-validation tool.
- Created a configurable project-folder setup tool using UI Toolkit.
- Implemented a behaviour tree plug-in with a custom editor for Unity using IMGUI.

Unity Netcode Developer | Cargo Pirates

Apr 2024 - Oct 2024

- Designed and developed a first-person co-op multiplayer game using Unity Netcode for GameObjects.
- Built a MySQL-based backend for player data and matchmaking.
- Implemented network synchronization, lobby systems, and gameplay mechanics.

Unity Developer & Team Lead | PAWNY

Sep 2023 - Mar 2024

- Led a 3-person team to develop a 2D platformer prototype from concept to demo release.
- Programmed core gameplay, UI, and menus using C# and Unity.
- Applied SOLID principles, design patterns and clean code practices.

EDUCATION

Bootcamp: Advanced Unity Programming in Video Games - LevelUp Game Dev

Oct 2024

Master: Video Games & Virtual Reality Development - IES Bernat el Ferrer

Apr 2024

CFGS: Cross-platform Application Development in Video Games - ENTI, University of Barcelona

Jun 2022

CFGM: Microcomputer Systems & Networks - Joan Pelegrí School

Jun 2019

TECHNICAL SKILLS

Programming Languages: C#, C++, SQL

Unity: uGUI, UI Toolkit, Input System, Netcode for GameObjects, UnityWebRequest

Development: REST APIs, async/await, object pooling, ScriptableObjects, JSON serialization

Architecture & Networking: SOLID, design patterns, clean architecture, REST APIs, multiplayer networking

Tools: Git, GitHub, Visual Studio

LANGUAGES

Spanish: Native | Catalan: Native | English: C1
